## Data Analyst

[anshu@careeremail.net](mailto:anshu@careeremail.net) | (856) 526-0878 | USA | [Linked In](#)

### Summary

Analytical and detail-oriented Data Analyst with strong experience in data visualization, SQL optimization, ETL development, and cloud-based analytics across AWS, Snowflake, and Azure environments. Adept at transforming raw data into actionable insights, automating workflows, building scalable dashboards, and improving data quality. Achieved measurable impact by streamlining reporting processes, reducing latency in data pipelines, and enhancing forecasting accuracy. Skilled in Python, R, SQL, Tableau, Power BI, and modern data engineering tools, with a proven ability to collaborate with cross-functional teams and deliver data-driven outcomes in fast-paced environments.

### Technical Skills

- Programming & Analytics Tools:** Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Plotly), R (dplyr, ggplot2, tidyr), SQL (Joins, CTEs, Window Functions, Query Optimization), Excel (PivotTables, VLOOKUP, INDEX/MATCH, Macros, Data Validation)
- Visualization & Reporting Tools:** Tableau (LOD Expressions, Calculated Fields, Dashboards), Power BI (DAX, Power Query, Power Pivot, KPI Scorecards), Looker (Dashboards & Reporting), SSRS
- Databases & Data Warehousing:** SQL Server, MySQL, PostgreSQL, Oracle SQL, Snowflake, AWS Redshift, MongoDB, Cassandra
- Cloud Technologies:** AWS (S3, Athena, EC2, Lambda, RDS, Glue, Redshift, IAM), Azure (Data Factory, Synapse Analytics, Databricks), Google Cloud (BigQuery, Cloud Storage)
- Big Data & Distributed Computing:** Apache Spark (PySpark), Databricks (Notebooks, Delta Lake), Hadoop Ecosystem (HDFS, Hive), Kafka (Streaming Pipelines)
- ETL, Data Integration & Automation:** ETL/ELT Pipelines, SSIS, Apache Airflow (DAG Scheduling & Orchestration), Power Automate, Alteryx, Python Automation Scripts, Shell Scripting
- Statistical Analysis & ML Techniques:** Descriptive & Inferential Statistics, Hypothesis Testing (A/B Testing), Regression (Linear, Logistic), Time Series (ARIMA, Forecasting), Clustering (K-means, Hierarchical), Classification (Decision Trees, Random Forests, SVM), Predictive Modeling, EDA (Python/R)
- Data Governance & Compliance:** HIPAA, GDPR, Data Quality Frameworks, Data Privacy, Role-Based Access & Encryption Standards
- CRM, ERP & Business Applications:** Microsoft Dynamics 365 (Sales, Marketing, Customer Service), API / Connector Integrations, Power Platform (Power BI, Power Apps, Power Automate)
- Collaboration, Version Control & Project Tools:** Git, GitHub, Jira, ServiceNow
- IDEs & Development Environments:** VS Code, Jupyter Notebook, PyCharm, RStudio

### Professional Experience

**Data Analyst, HCL, USA** 09/2024 – Present

- Achieved a 40% reduction in manual reporting and enhanced executive decision-making by 30% through designing interactive Tableau and Power BI dashboards with automated refresh cycles and KPI scorecards.
- Improved data accuracy by 20% by performing comprehensive data profiling, cleansing, schema validation, and resolving duplicates, missing values, and inconsistencies using SQL, Python (Pandas), and Power Query workflows.
- Reduced SQL query execution time by 25% by authoring, optimizing, and debugging complex CTEs, stored procedures, and multi-table joins across Oracle and SQL Server environments for faster insights.
- Enhanced reporting latency by 35% by developing end-to-end Python ETL/ELT pipelines integrating finance and customer datasets into Snowflake, creating a unified, automated, and scalable cloud-based data warehouse solution.
- Increased adoption of dashboards and analytical reports by collaborating with stakeholders to define KPIs, metrics, wireframes, and models, enabling improved operational visibility and informed business decision-making.
- Boosted forecasting accuracy by 15% by performing trend analysis, time-series forecasting, regression modeling, and churn prediction using Python and R, delivering actionable insights for strategic planning initiatives.
- Saved over 20 hours per month by automating recurring monthly and weekly reports using Python and Excel VBA, standardizing templates, ensuring consistency, and minimizing manual intervention across reporting teams.
- Enhanced onboarding efficiency by 25% by maintaining detailed documentation, including KPI definitions, data dictionaries, workflow diagrams, and reporting standards, facilitating smoother training and knowledge transfer for new analysts

**Data Analyst, TCS, India** 01/2022 – 07/2023 | Chennai, India

- Developed and optimized ETL workflows using Python, integrating ERP/CRM data into Snowflake, Redshift, and SQL Server, ensuring high-quality analytics, improved data consistency, and seamless cross-platform reporting.
- Increased project delivery efficiency by 15% through creation of Excel-based financial models and Tableau dashboards, monitoring KPIs, operational costs, resource utilization, and data-driven decision-making across multiple teams.
- Conducted exploratory data analysis with Python (Pandas, NumPy, Matplotlib), identifying revenue leakage and operational inefficiencies for a key client, recovering \$1.2M while enhancing strategic business insights and reporting accuracy.
- Optimized AWS Redshift warehouse pipelines, reducing data refresh cycles from hours to minutes, enabling near-real-time reporting, improved decision-making speed, and operational agility across multiple business units.
- Translated complex stakeholder requirements into SQL queries, datasets, and analytical outputs, improving business alignment, insight delivery, and decision-making effectiveness by providing actionable, accurate, and timely data insights.
- Automated recurring data validation checks using SQL triggers and Python scripts, eliminating frequent data quality issues, ensuring consistent accuracy of monthly reports, and saving significant manual effort across reporting teams.
- Designed multi-source reporting frameworks and performance scorecards, providing leadership with real-time visibility into KPIs, operational performance, and strategic metrics, thereby supporting faster, data-driven executive decisions.
- Standardized reporting templates and automated formatting workflows using Excel VBA and Python, saving over 20 hours per month, reducing repetitive work, and improving overall efficiency of reporting processes.
- Collaborated on data modeling, schema refinement, and indexing strategies to improve SQL query performance and dashboard responsiveness, enhancing analytical efficiency and enabling faster insights from complex datasets.

### Education

Master of Science (M.S.) in Computer Science 08/2023 – 05/2025  
Rowan University Glassboro, New Jersey, USA

### Certifications

- PL-300 (Microsoft POWER BI Data Analyst Associate)
- HIPAA - Accountable
